

風車草 (Umbrella Papyrus)

Cyperus involucratus

常綠多年生植物，原生於非洲熱帶地區。根莖從泥土長出像傘子的葉，葉片由幼長的葉組成。夏季會長出白花。風車草形態特別及可以適應濕潤環境，因此被廣泛栽培作為水生植物。

Umbrella Papyrus is an evergreen perennial plant which is native to tropical region in Africa. Its leaves come from rhizome in soil, formed by long and narrow leaves that looks like an umbrella. It bears white flowers in summer. Umbrella Papyrus has a special form of growth and can adapt to wet environment, therefore it is widely cultivated as a water plant.

名稱 Common Name	風車草 Umbrella Papyrus
品種名稱 Botanical Name	<i>Cyperus involucratus</i>
科 Family	莎草科 Cyperaceae
花期 Flowering Period	四月至八月 April to August
果期 Fruiting Period	四月至八月 April to August
校園分佈位置 Where to find in CityU	中國花園 Chinese Garden
